Control Management, Inc.
has been keeping buildings in the
Carolinas comfortable, safe, secure,
and energy efficient for over 30 years. We have
a proven history of designing, installing, and
maintaining building automation and control
systems that work for our customers.

Siemens Building Technologies

As a qualified Siemens Solutions Partner, we are able to provide
the most advanced building solutions available to meet your
needs.

Complete Service Support

Keeping your facility safe and its many operations performing at their best requires your systems infrastructure to be serviced and maintained quickly and by experts. With 4 offices across the state, we are uniquely positioned to provide quick on-site and remote services including:

- 24 hour emergency assistance
- Immediate parts availability
- Training onsite or at our Training Center
- Test, inspection, and preventative maintenance

Compatibility by Design

Leveraging the Siemens forward and backwards design philosophy and the CMI range of service offerings, we will make sure that your system never becomes obsolete. Our systems can be scaled to meet current performance requirements and added to as your needs grow. Information and control is always accessible to those who need it- when and where they need it.

Systems Designed for YOUR Facility

We have extensive experience in providing customized solutions for large and small facility environments. Combining comprehensive service offerings and the Siemens family of building automation, control, and life safety systems, CMI is your single source for building management needs.

Ask us anytime for local references for your facility type.
